

Economics AA-T (IGETC GE Track)

+If you have completed coursework at another college and/or are starting in a semester other than a Fall term, please follow up with the Counseling Department to determine if this sequence is appropriate for your academic and career goals.

Program Description:

Economics study attempts to clarify how the use of natural, technical and financial resources affect the lives of human beings. Economic concerns can range from how individuals and businesses make decisions, to the roles of government and the Federal Reserve, to the complex world of international trade. Economic theories are examined and applied to the modern economic world. Topics of specialization include macroeconomics and microeconomics, how businesses make decisions, business statistics, using numbers for analysis, U.S. economic history, the economic development of the U.S. economic history, the economic development of the U.S. consumer economics, how consumers make economic choices and comparative economic systems, and the comparison of capitalism and socialism as it is applied in different countries. [The Student Transfer Achievement Reform Act \(SB 1440\)](#)

Program SLO: 1) Students will be able to analyze and evaluate Scarcity, the fundamental concept defining Economics and be ready to transfer and complete successfully various upper-division academic-degrees, especially in Economics, Finance and Business. 2) Students will be able to examine how limited resources allocations occur throughout markets and government policies by applying and appraising the Classical and Keynesian principles to Business Fluctuations in terms of Economic Growth, Changes on the Average Price Level and Labor Employment. 3) Students will be able to compare and contrast the decision-making processes of consumers and firms, regarding Scarcity, under different levels of competition in the Product and Resource markets. Students will distinguish and apply the qualifying assumptions of Perfect Competition, Monopoly, Monopolistic Competition and Oligopoly theories. 4) Students will be able to acquire the quantitative tools and the historical perspectives to advance awareness of the interdependence between Government Policies and Positive Economics.
