HOW TO ENABLE READER MODE IN CHROME BROWSER ON A MAC COMPUTER

Step 1: Make sure your Chrome is updated to version 75

Even if you have set up the browser to automatically update to the latest version, you may want to check out if it's already installed.

To do so, click on "Chrome" next to Apple logo in the menu bar, and then select "About Google Chrome" from a drop-down menu.

Chrome 75 for Mac, Windows, security key manager, 'Scroll S

If you see a blue check mark, a text "Google Chrome is up to date," and below "Version 75.0...," it means your browser is ready for Reader Mode.

🧿 Google Chrome	
Google Chrome is up to date Version 75.0.3770.80 (Official Build) (64-bit)

If you are still using version 74, make a manual update by clicking on a blue button, and restart the browser.

Step 2: Enable Reader Mode in experimental settings

As I mentioned above, Reader Mode was added to Chrome's experimental features, and you must enable it manually by going to the "flags" section.

To do so, type in the Chrome's address bar:

chrome://flags

Then, in a search box, type "reader." The feature "Enable Reader Mode" should appear on the top of the list.

> C (Chrome chrome://flags	1	* 000
Q	reader 2	0	Reset all to default
Exp	eriments		75.0.3770.80
	Available Una Enable Reader Mode Allows viewing of simplified web pages by selecting 'Customize and control Chrome's 'Dis page' - Mac, Windows, Linux, Chrome OS #enable-reader-mode	Unavailable	
Enable Allows page' - #enab	Reader Mode viewing of simplified web pages by selecting 'C Mac, Windows, Linux, Chrome OS le-reader-mode	Customize and control Chrome'>'Distill	Disabled

In a drop-down menu to the right, change "Disabled" to "Enabled," and click on a blue button "Relaunch Now" in the bottom right corner.

Optionally, you can type in the address bar: <u>chrome://flags/#enable-reader-mode</u>
